Jorge E. Vizualles Foreign Investment and the Environment in International Law (Surya Deva)
Stewardship is a broad concept that is used in various ways. Even within discrete disciplines, the concept can take on multiple meanings. For example, in environmental law, stewardship is often used to refer to the duty to care for the planet, but also as a specific duty towards land. This multiplicity of uses has led to conceptual complexities. In order for stewardship to be useful in inform environmental law, this article proposes a conceptual framework according to a network of actors and duties.

**KEYWORDS:** Stewardship, environmental citizenship
